Dear Friends:

Please tell us, if you can, what light Sister White gave us on chiropractics. We seem unable to find any. Isn't the spine a part of the body? On subjects which she shed no light on, is anyone at liberty to assume she would condemn or recommend?

Talking about the "middle of the road" so often referred to, in women's fashions how does it apply? High heels are a health hazard and transparent and low-necked dresses are immodest. Hazards and immodest articles belong on the broad road. Is there not some department of the General Conference which could speak through its women on the Spirit of Prophecy on dress? The medical, domestic, or Ministerial? The need is great.

Hope to hear from you soon. Thank you.  
Sincerely,
