

Mrs. W. has in two visions been shown something in regard to the time of the commencement of the Sabbath. The first was as early as 1847 at Topsham, Me. In that vision she was shown that to commence the Sabbath at sunrise was wrong. She then heard an angel repeat these words, "From even unto even shall ye celebrate your sabbaths." Brother Bates was present, and succeeded in satisfying all present that "even" was six o'clock. Mark this: the vision at Topsham did not teach the six o'clock time. It only corrected sunrise time.

I never received the idea that the six o'clock time was sustained by the visions, hence the following which I copy from a statement I made in the Review upon this subject, Dec. 4, 1855 as follows:

( See proper citation on another sheet: "We have never been fully satisfied.... time to thoroughly investigate it.....six 6'clock time has been inferred."

James White in article, "Time to Commence the Sabbath," Vol. 31,
